## PRODUTOS / MÁQUINAS

LAND, acknowledged leaders in the field of temperature measurement, have supplied the glass container and hollowware industry throughout the world with temperature measuring equipment for over 55 years. Today, LAND manufacture a whole range of measurement instruments specifically designed for the glass industry. All are designed to the highest standards of quality and reliability to ensure accurate measurements under plant operating conditions. The measurement of temperature at critical locations in the production process is essential for the full understanding and efficient control of glass manufacture and processing.

## HISTÓRIA DE EMPRESA

LAND Instruments International is the world leader in the design and application of infrared temperature measurement for industry. Land is known as both innovators and manufacturers of high quality precision radiation thermometers and thermometer systems; Land's position is unrivalled with over 60 years experience in temperature measurement. Land products are used extensively in applications as diverse as steel, glass, electronics, mineral processing, power generation, utility and aircraft gas turbines, and a wide range of other industries. Ongoing development creates products for new applications and the continuous improvement of an expanding product range.

Infrared temperature measurement product range includes:

Fixed, on-line thermometers and systems – for process control and product quality  
Portable infrared thermometers – for spot measurements  
Process thermal imagers – for asset management and process control  
High Resolution, infrared scanners for fast moving materials  
Calibration Furnaces

Quality is an integral part of the LAND philosophy, where all levels of management and employees are responsible for the quality of their work, to ensure complete customer satisfaction. Quality, traceability and overall service remain the highest priority at LAND. The Quality Management System

at LAND Instruments International is approved to ISO 9001. With the recognition of accuracy as the foundation of good product design - the LAND laboratory was the first, in 1970, to be accredited for the issue of calibration certificates for thermal measurements. Again in 2001 LAND were the first to meet the requirements of ISO 17025 - and remains one of the world's leading calibration laboratories today.

Company Profile of **LAND Temperature Measurement, Ametek**
