

SAATI
since 1935

CORPORATE OVERVIEW

- ❖ Year of foundation: 1935
- ❖ Headquarter: Appiano Gentile (CO), Italy
- ❖ Core business: development, production and commercialization of highly advanced textile and chemical products
- ❖ Employees: 850
- ❖ 2013 Sales Volume: 136 million €

We want to be a world class player in offering innovative fabric-based industrial components.

We blend different technologies and drive complementary knowledge in a customer-based view of the future.

We believe in a future shaped by evolutionary innovations stemming from a special spirit for exploration.

- Technical and organizational integrity (experience, history and local culture)
- Ethic and transparency, fairness, respect for environment, the human life and individual well being.
- Commitment and participation to realization (sense of purpose and of mission)
- Belonging, joint responsibility, sense of community and stability
- Quality of life through technological nobilitation of daily objects
- Open-mindedness to global cultures and skills as means to individual and professional development.

SAATI is active in the market with **Five Divisions**, which are focused on specific market niches: Filtration, Screen Printing, auxiliary Chemicals, advanced Composites and Protection.

FILTRATION

PRINTING

CHEMICALS

PROTECTION

COMPOSITES

SAATI-Filtration specializes in the production of technical fabrics and components with special finishing treatments, incorporating the latest in technology to guarantee the highest quality and consistency. The products are used in a wide range of different fields, such as:

WATER

SAATIAQUA

AUTOMOTIVE

SAATIMOTION

HEALTHCARE

SAATICARE

APPLIANCES

SAATIDOMUS

PROCESS

FUGAFIL

BELTING

SAATIBELT

FOOD&MILLING

SAATIMIL

CONSUMER
ELECTRONICS

ACOUSTEX

SAATI supplies highly precision woven fabrics in Polyester and Polyamide fibers with excellent dimensional stability, uniformity, durability, and enhanced characteristics and performances thanks to special and proprietary finishing treatments.

These technical precision fabrics are used in the screen printing process, especially for the following sectors:
Graphic, Textile, Tile industry, Electronic, Glass, and CD.

SAATI Chemicals formulates and manufacturers:

- Photosensitive films and Emulsions lacquers
- Mesh pretreatments
- Adhesives
- Fillers/blockouts
- Reclaiming chemicals

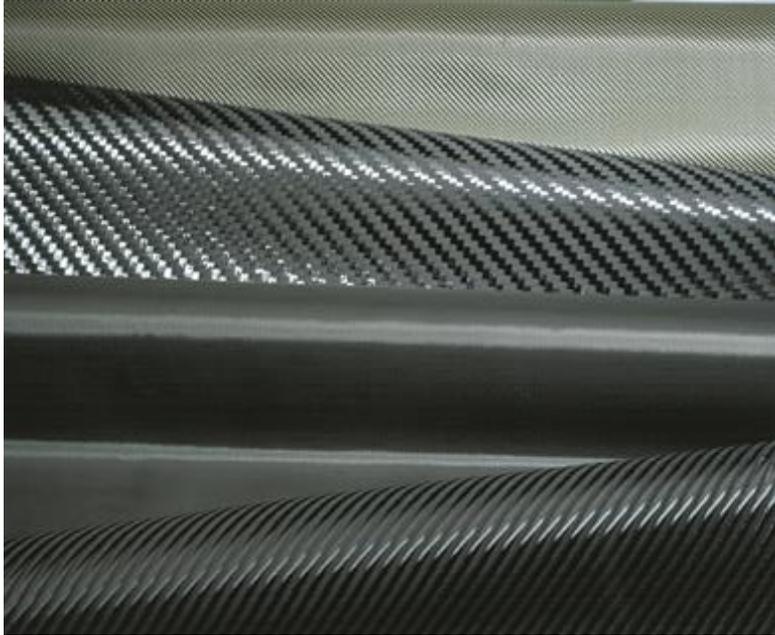

SAATI – Chemicals' activity till now has been focused on screen-printing, offering product lines for the most diverse and demanding applications from display and industrial graphics to ceramic tiles, circuit boards, optical discs, and textiles.

SAATI offer also includes the

products, a complete range of screen chemicals.

SAATI Composites manufactures:

- fabrics
 - unidirectional
 - multi-axial prepreg fabrics
- in carbon , aramid and glass fibers.

The Division formulates its own resin systems for the impregnation of fabrics with epoxy, phenolic, vinylester and polyester formulations.

Main applications are: marine, aerospace, automotive and rail transport industries, sports equipment producers, construction builders and robotics.

The **Protection Division** is focused on the production of fabrics in aramid fiber also treated with water repellency finishing, coated with unique resin systems and laminated for multi-threat protection products, both for personal and light-armoring protection.
