

Biogas purification with pressurised washer

Innovative products around technical gases

ReiCat is the leading company for gas purification and gas recycling. ReiCat develops and produces systems for the most efficient application of valuable technical gases.

Your application

Biomethane

- Treatment of biogas
- Feed-in to natural gas grid

Carbon Dioxide

- Waste water neutralisation
- Aqua culture
- Beverage industry

Your advantages

- Purification system with low energy consumption
- Efficient utilisation of biogas in biomethane and carbon dioxide form

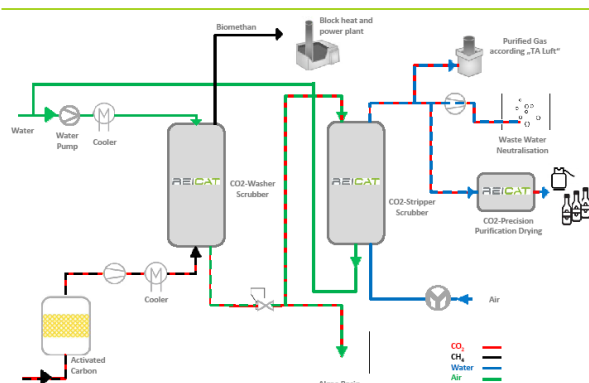

Our solution

- Cost-efficient pure gas production by means of adsorption and desorption
- Components to remove:
CO₂, H₂S, H₂O

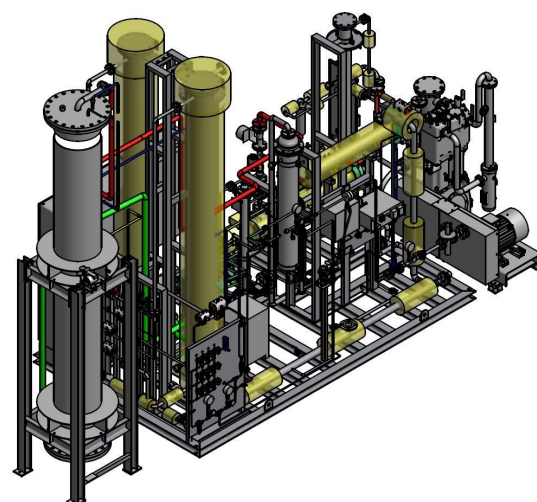

Special features

- Different kinds of purification processes can be combined (e. g. preliminary and fine purification of biogas)
- Concepts individually designed according to amount of impurities and customer needs
