Contact 6.	Sr. Leszek Jedrzejczyk Chief Designer / Vice President of the Board Phone:

PRODUTOS / MÁQUINAS

We're an engineering company that supplies the most advanced technology for producers of glass. We design, produce and deliver batch plants and furnaces, but also we supply equipment necessary for batch plants (batch chargers, crushers, vibrating feeders, scraper conveyors - SmartScraper™, elevator&conveyors, weighing and dosing system, control system) and for furnaces (gas stations, control system, electrical boosting, bubbling) - the equipment is designed by our engineers and produced in Poland at our production plant.

HISTÓRIA DE EMPRESA

„Progress through technology” means that we combine 30+ years of experience in glass production with the most advanced technology in designing, engineering, fabricating and erecting glass furnaces and batch plants for our clients. We provide complete glass production solutions for manufacturers of glassware and packaging glass, as well as float glass, water glass and fibre glass.

The company employs 250 highly qualified people, including 40 engineers.

One of our core values is integrity – our employees are trained to always do the right thing for the client, even if it means reducing our profit. We also attach huge value to human safety when working in extreme conditions and we're proud of our safety record.

Last but not least, FORGLASS is a socially responsible company, engaged in several charitable activities, the most important of which is Life Plan, a developmental program for teenage children.
