Gottfried-Schenker-Straße 17

09244 Lichtenau

PRODUTOS / MÁQUINAS

Continious dryer EVENT

Drying and fixing of coated surfaces with ceramic, organic, non-organic and other solvent-based colours as well as UV-pastes and digital inks

Performance features:

Electrically heated continuous dryer for flat glass Up to a thickness of 19 mm and widths up to 260 cm Effective drying results by high air flow

Also by combi with various medium-wave IR emitters

Cost reduction by using heat recovery

Energy saving due to specific user programs

Steplessly adjustable drying temperature up to 180 ° C

Large use variety for different applications

Customer specific dryer design according to modular construction

Highest drying quality

User-friendly PLC control with job administration

Integrable with all general applying technologies

For screen printing, Rollercoat or digital printing

Technical details

Working widths: 90, 110, 130, 150, 170, 190, 200, 230, 250, 260 cm

Variety of modules: combination hot air/infrared (2 m)

Variety of modules: UV module (1 m), UV cooling module (2 m) Cooling module passive (2 m), active (2 m), inlet / outlet (0.6 m)

Transport system: teflon coated glass fibre belt on driven rolls Transport system for thin glass: teflon coated glass fibre belt

Transport rolls wrapped with fire protection tube

Max. thickness of panels: 19 mm, Working heights: 935-1400 mm

Heating: electrically heated

Belt speed: steplessly adjustable from 1-10 m / min

Temperature: process air steplessly adjustable up to 180 ° C

Temp. infrared : continuously variable, optionally switchable in groups PLC control: stand-by operation, job management, process interfaces

Temperature control, optionally adjustable circulating air volume Electrical connection: 400 V, 3 PEN, 50 Hz, Optional other versions on request

Continious dryer GIANT

Drying and fixing of coated surfaces in large format with ceramic, organic, non-organic and other solvent-based colours & digital inks

Performance features

Electrically heated continuous dryer for flat glass
Glass up to a thickness of 25 mm & widths up to 350 cm
Even and homogeneous drying of large surfaces
Unique working principle above the glass panel
Highest drying quality
Cost reduction by using heat recovery

Energy savings due to specific user programs

Steplessly adjustable drying temperature up to 180 ° C

Customer specific dryer

Design according to modular construction User-friendly PLC control with job administration Integrable with all general applying technologies Like screen printing, Rollercoat or digital printing

Technical details

Working widths: 300, 350 cm

Variety of modules: combination hot air/infrared (2 m), cooling module passive (2 m)

Inlet / outlet (0.52 m)

Transport system: driven transport rolls wrapped with high-grade steel strip

Max. thickness of panels: 25 mm Working height: 935-1000 mm Heating: electrically heated

Transport speed: steplessly adjustable from 1-10 m/min Temperature: process air steplessly adjustable up to 180 $^{\circ}$ C

Temperature infrared: steplessly adjustable, optionally switchable in groups PLC control: stand-by operation, job administration, process interfaces

Optionally adjustable circulating air volume Electrical connection: 400 V, 3 PEN, 50 Hz

Other versions on request
