PRODUTOS / MÁQUINAS

As one of the largest solar module providers in the world, Suntech has an established track record of delivering consistently high quality solar solutions to our valued customers. We take pride in providing you with the most technologically advanced and reliable solar energy products.

At Suntech, our product line is led by our passion to design and deliver energy solutions that not only keep pace with global needs, but anticipate them as well. Whether you are looking for our energy efficient and cost effective Monocrystalline and Polycrystalline products or our cutting edge Building Integrated Photovoltaic (BIPV) MSK Solar Design LineTM products, Suntech has the right products for any project you can imagine.

Suntech MSK Solar Design LineTM Products

Suntech's MSK Solar Design LineTM of products offers superior aesthetics compared to standard PV modules and can be used to create buildings that are sustainable, functional and visually stunning. MSK is the name of the Japanese specialist in Solar Design, with experience in solar dating back to 1981, that Suntech acquired in 2006.

The majority of Suntech's MSK Solar Design LineTM products are Building Integrated Photovoltaic (BIPV) modules. These BIPV modules function, not as an add-on, but rather, as an integral part of the building skin. They can be used just like standard building materials, but with the added value of generating electricity directly from sunlight. BIPV modules provide greatly improved aesthetics and allow savings over traditional building materials and installation.
