PRODUTOS / MÁQUINAS

Do you know our new one already? Technoplus Drillmaster
....the practical helper for professional glass working!

our new glass manufacturing machine

Newly developed/highlight!

Persistent glass working from one side
Technical data:

Measurement WxTxH: 200cm x 100cm x 240 cm
Weight: 2000kg
Bore diameter: as needed by CNC control unit
Cutout: as needed by CNC control unit
Movement: all via actuator
Rotation speed of the milling spindle: 0-15000 rpm
Glass size: from 3-25mm
Processing height: up to 1300 mm (bigger glass can be used since the machine is open on top)
Edge working: milling, curves...(by the use of different tool geometry)
Tools: 3 pc hollow drill with special geometry for one-sided working (drilling, milling etc. with only one tool)

Advantages:

Little space requirement due to vertical built
Flexible and rational working due to one-sided glass processing
Little amount of tools and tool exchange needed
Automatic positioning of the glass
User friendly input via touchpanel
Due to modular construction the machine may be extended anytime

CAD/CAM system
Network compatibility and data exchange with external processor
Extension modulus 1000mm or 2000mm, right/left
Extension modulus 2000mm, with precision drive mechanism or as a pulley modulus
Build your own DRILLMASTER with us!

The customer's benefit is our priority. That's why all our machines are matched and realised with our customer's needs. So your ideas and wishes are put directly into our plans and we will get the most cost average effect for you.

Advantages:

Designed by your applications
Applied, process optimizing and cost efficient
Different adaptations are possible
Modular and designed for your needs
