PRODUTOS / MÁQUINAS

Alusistemi s.r.l. produces and markets ATLANTE 45 and ATLANTE 80 aluminium alloy and stainless steel profile and accessory systems. ATLANTE 45 and ATLANTE 80 are ideal for creating simple and complex mounting, orientation and anchoring structures for most common types of photovoltaic panel. Both systems use various types and sections of profile according to the different frames and panels involved, and according to the loads and forces likely for the geographic area and climatic conditions. In designing the various elements of ATLANTE 45 and ATLANTE 80, a great deal of effort has been made to ensure rapidity and functionality in the assembly of panel mounting frames. Installation times and the costs associated with preparation, assembly, installation and commissioning are therefore minimised. Atlante 45 and 80 are ideal for all types of installation, from the smallest domestic system to large scale installations for clean energy generation. Atlante 45 is designed for sloping roof and flat installations (on flat roofs, terraces and concrete platforms etc.), and comes with a kit of highly functional, pre-assembled triangular brackets that greatly facilitate the assembly and alignment of panel mounting frames. Atlante 80 is designed for medium to large installations with up to three rows of panels anchored together, and is mainly suitable for use in open installation areas. For further information and details, go to www.aluteam.it, then select Alusistemi and Atlante, or contact our sales office on +39 049630157.
