Endereço **RENERCO Renewable Energy Concepts AG**
Herzog-Heinrich-Straße 9
80336 München

PRODUTOS / MÁQUINAS

Since many years RENERCO develops, implements and operates renewable energy plants across Europe. The company focuses on solar power, wind energy and geothermal energy projects. RENERCO acquires suitable sites and develops efficient projects in cooperation with local partners. Experienced project managers oversee projects through the construction process to ensure their successful turnkey realisation. In addition to the self developed projects, RENERCO also acquires and supports projects in various development stages, develops and realises them successfully. The company provides pre-financing and performs project finance structuring. By working together with selected financial institutions, the company creates bespoke project financing that is optimal for the project company and tailored to the requirements of each individual project. Within technical operation and commercial management RENERCO currently oversees a range of projects of diverse manufacturers with a total installed output of more than 500 MW. Through intensive monitoring, regular on-site inspections and fault analyses the company helps minimize levels of down-time and to boost plant lifetimes. Customers from a wide range of investment and leasing companies, banking institutions and institutional investors rely on RENERCO's know-how and experience for technical and commercial analyses of entire projects, including complete due diligence. RENERCO also supports investors during the construction and operational phase of a project. Related projects meanwhile amount to an investment volume of 3 billion euros.
