PRODUTOS / MÁQUINAS

RP Technik GmbH Profilsysteme, a wholly-owned subsidiary of the Welser Group, is an autonomous systems developer, full-service provider and manufacturer of ready-processed steel profile systems. For more than two decades, products sold under the brand "RP Technik" have stood for high-quality steel and glass construction, both from the aesthetic and the technical-functional perspectives. The different system variants of our filigree steel & glass constructions are used as facades, doors, separating wall systems and windows, and they even fulfil the sensitive requirements of fire protection, smoke protection and sound insulation. Burglary protection and even bullet and explosion resistance can be integrated into the modular system. In recent years, renewable energy sources such as photovoltaics, solar thermal energy, wind energy and biomass energy have become increasingly significant. The challenges of the new energy saving regulations, climate protection targets and the resources situation require a re-think. RP Technik GmbH Profilsysteme are making a contribution to the re-think process and are expanding their product range with building integrated photovoltaic systems (BIPV).
