## PRODUTOS / MÁQUINAS

Orwell Engineering Solutions has over 40 years experience in the production of precision machinery for the hot end of float glass production, having worked primarily with Pilkington Glass in the early years of their development of the Float Glass process.

This equipment has to operate for long periods in hostile conditions, often in temperatures of up to 1500 degrees centigrade. It is critical therefore that machining, fabrication, assembly and testing standards are maintained at the highest level. Orwell can guarantee this level of expertise.

Orwell Engineering is based in Liverpool, in a 25,000 sq ft factory, within easy access of rail and motorways and both North West airports.

Orwell's strength is that we work closely with clients to ensure we provide comprehensive engineering solutions to their problems. This hands-on approach to projects has helped us build up a vast resource of experience plus an enviable reputation within the industry for quality workmanship.

The skills built up over the past 40 years can be easily transferred into other areas, therefore in addition to working in the global float glass industry, Orwell also has extensive experience in the following sectors:

Petro-chemicals, Pharmaceuticals, Nuclear Industry and Food Processing

### Company Profile of **Orwell Engineering Solutions UK**

A service of glasssglobal.com, an affiliate of glasssglobal group.
