PRODUTOS / MÁQUINAS

Supplier of Conveying, Transport, Packing and Warehouse Technology, Handling Systems Samson 380 Surface Feeder for Glass Cullett The slow moving wide belt principle of the Samson is ideal for handling highly abrasive material. Similarly for handling wet sands the Samson eliminates problems of blockage and bridging associated with conventional tapered hopper reception systems. The Samson may be utilised for the handling also of Silica Sands and Soda Ash within the raw materials production plant and at the Glass Works along with B&W Kleen-Line, Steep Angle and Troughed Belt Conveyors. Installed above ground the Samson represents an economical alternative to conventional underground pits and hoppers without the need for extensive civil works saving both on the installation costs and the cost of associated conveyors and handling equipment. Above ground installation is far more flexible allowing the reception equipment to be conveniently located within existing installations and easily relocated should plant development require. B&W offer a complete design and build service including all associated plant and conveyor equipment supplied as a complete materials handling package including associated silos etc.

Company Profile of **B & W Mechanical Handling Ltd.**

A service of glasssglobal.com, an affiliate of glasssglobal group.
