Stonefields, Auckland 1072

PRODUTOS / MÁQUINAS

Specialist Glass Printing

Wine glasses, bottles, jars, candles and many other glass items can all be screen printed. Like ceramics, the print area and number of colours will determine the process used. One colour prints are the most common for glasses and in the case of restaurants, we can print your logo to a specific pour which will ensure you do not have to rely on your staffs' guesswork and therefore maintain your profits.

For those who have the need for glass decals only for your own requirements, we also offer this service.

DIGITAL PRINT ON CERAMICS

Ascent 3D Print is the first company in New Zealand to be able to offer kiln fired digital printing for ceramics. This is NOT to be confused with sublimation which has limited dishwasher and UV durability.

As this is a transfer process, any ceramic item is able to be printed. Whether it is a plate, coffee mug or tile this process may be the best solution. Unlike screen printing the number of colours is not limited and there is no film cost. The process is particularly suited to low runs due to not requiring film and screens.

The quality of the final result is only limited by the quality of the supplied artwork. We can produce up to 1200dpi images for those who demand quality.

Company Profile of **Ascent 3D Print**

A service of glasssglobal.com, an affiliate of glasssglobal group.
