## PESSOAS PARA CONTACTAR

Contact 1.	Sr. Dipl.-Eng. Fred Vogler Authorized Officer Phone:
Contact 2.	Sr. Dipl.-Eng. Nico Thomae Managing director
Contact 3.	Sr. Sebastian Hollatz Product Manager TMC Phone: 0049 36785 587 0
Contact 4.	Sr. Raven Liu Project Manager China

## PRODUTOS / MÁQUINAS

Supplier of Equipment for non-contact Measuring and Control Equipment, particularly non-contact Glass Thickness Measuring Systems for Container Glass, Float Glass, Display Glass and Glass Tubes as well as a comprehensive Range of Instruments for the Automation of Glass Tube Manufacturing such as Defect Detection, Diameter Gauges, Sorting and Control Systems, Automatic Quartz Glass Resizing. A comprehensive range of inspection systems is available. Special emphasis is placed on non-contact thickness measuring instruments.

TMC - Thickness Measurement system for Container glass

TMF - Thickness Measurement system for Float glass

Special solutions (TC Tube Control, TMP Thickness measurement for Patterned glass, TMT Thickness measurement system for Tubular glass hot/cold, ODMT Outer Diameter Measurement for Tubular glass, Off-line systems a.o.)

## HISTÓRIA DE EMPRESA

VMA is specialized in designing and producing **opto-electronic measuring and testing equipment for the glass industry**, particularly thickness measuring equipment. Our equipment is designed in accordance with the special needs of our customers. They contain all necessary components for **turn-key systems**. Our engineers have been working in the glass industry for many years. Therefore we are familiar with the special questions for the **testing of glass articles** as well as the technological problems of **glass manufacturing**. Our strength is to provide our customers with a whole system of know-how. We are able to link our experiences with innovative solutions and sophisticated technologies.

**Consultation Specialists** in optics, electronics, software, handling and cooling with many years of experiences in the glass industry give you advice on the solution of your problems.

**Analysis** Together with your specialists we analyse your process and take down the layout of your plant for an optimisation of it.

**Functional Specifications** We give support in formulating functional specifications for a technically realizable and economically acceptable task.

**Realization** We solve your problem by combining and adapting our various products. Adaptation is done by variation of the optical, electronic, mechanical and cooling parameters. Software is produced for your solution individually.

**Turnkey Systems** We deliver, install, put the system into operation and train your operators and your service personnel. Technical Service A detailed documentation and the cooperation of our specialists with your maintenance personnel are good preconditions for a reliable and quick technical service.

**Maintenance Service** We offer a mobile after-sales-service, also with maintenance contract, if desired. In addition, we can check and calibrate your automation system regularly in order to realize your quality system.

**Spare Part Service** The main expendable parts we have on stock. Provision and production of spare parts are carried out as quick as possible.

### Company Profile of **VMA GmbH**

A service of glasssglobal.com, an affiliate of glasssglobal group.
