## PRODUCTS OR MACHINERY

Digital Enterprise ensures business success in the glass industry

Digitalization is transforming the glass industry in the same way it was once transformed by electrification and automation. In glass manufacturing, digitalization solutions along the entire value chain are currently the crucial lever for more fully exploiting possibilities in glass production. Digital Enterprise is the comprehensive portfolio from Siemens for the digital transformation with solutions for the specific requirements of the glass industry. Find out how plant operators and equipment suppliers in the glass industry can become more efficient, more flexible, and faster with innovative solutions from Siemens thanks to significant increases in productivity.

## COMPANY BACKGROUND / HISTORY

**Siemens AG** (Berlin and Munich) is a global technology powerhouse that has stood for engineering excellence, innovation, quality, reliability and internationality for more than 165 years. The company is active in more than 200 countries, focusing on the areas of electrification, automation and digitalization. One of the world's largest producers of energy-efficient, resource-saving technologies, Siemens is No. 1 in offshore wind turbine construction, a leading supplier of combined cycle turbines for power generation, a major provider of power transmission solutions and a pioneer in infrastructure solutions as well as automation, drive and software solutions for industry. The company is also a leading provider of medical imaging equipment – such as computed tomography and magnetic resonance imaging systems – and a leader in laboratory diagnostics as well as clinical IT. In fiscal 2014, which ended on September 30, 2014, Siemens generated revenue from continuing operations of €71.9 billion and net income of €5.5 billion. At the end of September 2014, the company had around 357,000 employees worldwide. Further information is available on the Internet at <http://www.siemens.com>.
